STUDENT ACTIVITY

Set yourself up for success by becoming a super student. Ask yourself the following questions to determine a plan of attack for studying for tests.

# SUPER STUDYING

## What does your study schedule usually look like now?

Where? \_\_\_\_\_

When? \_\_\_\_\_

How? \_\_\_\_\_

## How can you study better?

Where is a quiet and distraction-free place you can study? Don't forget to consider locations other than your house – the best place may be the library or a neighborhood community center. Turning off electronics or closing your bedroom door can make a noisier area a study zone, too.

When are you most alert and not committed to another activity such as sports?

How do you study best? What strategies work best to help you learn – reading, taking notes as you review material, making flashcards or talking about it with another person?

## Take action!

When is your next test? \_\_\_\_\_

Map out a plan to study for the exam, including several study sessions over several days before the test.

Date	Time	Location	Study Strategies
<i>Example: Monday, Oct. 3</i>	<i>7:30 - 8:30 p.m.</i>	<i>my room w/door closed</i>	<i>Read chapters and create flash cards</i>
_____	_____	_____	_____
_____	_____	_____	_____
_____	_____	_____	_____
